

WHAT IS CLAIMED IS:

1. In a hairbrush comprising:
 - a bristle mount is fitted at the end of a handle;
 - and a plurality of bristles mounted on said bristle mount;
 - said bristle mount and said bristles formed in part from a silicon dioxide based multi-element mineral powder formed by crushing a multi-element mineral.
2. The hairbrush of claim 1 wherein, in addition to said bristle mount and said bristles, said handle also comprises in part a multi-element mineral powder.
3. The hairbrush of claim 1 further comprising mixing a far-infrared emitting powder formed by crushing a far-infrared emitting material with said multi-element mineral powder.
4. The hairbrush of claim 2 further comprising mixing a far-infrared emitting powder formed by crushing a far-infrared emitting material with said multi-element mineral powder.
